

The amendment to page 19, lines 10-12 was needed to correct an obvious error in the description of the drawings. No new matter is entered by this amendment.

**DRAWINGS**

The drawings were objected to as failing to comply with 37 C.F.R. §1.84(p)(5) because they do not include the reference number 302 mentioned in the description, and it was not clear what reference number 602 was indicating.

Applicants have attached under separate cover a proposed drawing change to amend Figure 8 of the application drawings by adding reference number 302 to the drawing to identify the supporting pin. The addition of reference number 302 is supported by the specification at page 19, lines 10-12, and thus, does not add new matter. It is believed this drawing change will overcome the objection.

With respect to reference number 602, applicants have amended the specification at page 19, lines 10-12, to clarify that the reference number 602 is referring to the end of the supporting pin to which the return spring 6 is hooked. Thus, reference number 602 correctly indicates the end of the supporting pin 302 to which the return spring 6 is hooked. Therefore, reconsideration and withdrawal of the objection are respectfully requested.

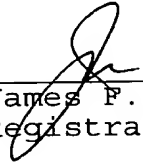

In view of the foregoing amendments and remarks, the application is respectfully submitted to be in condition for allowance, and prompt, favorable action thereon is earnestly solicited.

If necessary to effect a timely response, this paper should be considered as a petition for an Extension of Time sufficient to effect a timely response, and please charge any

deficiency in fees or credit any overpayments to Deposit  
Account No. 05-1323 (Docket #381NP/43716).

Respectfully submitted,

April 2, 1999
